

OHS ACT ADVANCED

OHS ACT ADVANCED

PRE-REQUISITES: Literate

DURATION: 5 Days

TARGET GROUP: Safety Officers

INTRODUCTION

The uninterrupted availability of all resources in industry and in particular the health and safety of its employees, are crucial needs for operational and economical development. The establishment of compliance with the Occupational Health and Safety Act will enhance the operational capabilities in the company, on condition that the corner stone in the process will be the identification of hazards and evaluation of associated risks. This approach will ensure meeting and exceeding the expectations of all stakeholders, as well as effective control over positive growth.

The guiding principle in the OHS Act is the responsibility of the employer to pro-actively identify hazards and the development of control measures to either eliminate or mitigate risks. In essence the Act requires a well-defined health and safety maintenance plan.

COURSE OUTCOMES

On completion of this course the learner will understand his/her responsibility and accountability as demanded in the OHS Act. The learner will further be exposed to the intentions of the legislator and the general legal system.
